

How to use your Tablet or iPad Computer

This course is aimed at those who have recently bought a tablet or iPad computer and would like to learn the basics and get more out of it. This course would also be suitable for those who would like to learn a bit more about tablet computers before purchasing one.

Learners will learn how to use most of the basic functions on their tablet computer and build their confidence.

At the end of the course, learners should be able to:

- use a touchscreen
- open an App
- access the settings menu
- access key information about their tablet
- connect to a Wi-Fi signal
- browse a website
- download and install an app
- send e-mail
- make a video call

Learners should bring their own tablet computer if they have one (Please enquire about the possibility of using one of DCFL's tablets for the duration for the course, available only on Tablet courses, not iPad)

Please bring any paperwork, cables and chargers with your tablet. You will need all the relevant log in details for Google accounts, Apple IDs and E-mail accounts.

Please note we run separate courses for Tablets & iPads as they use two different operating systems.

Please let us know of any additional support you may require, when booking this course.
